## COMMERCIAL CMS ORDER WORKFLOW

**1 DATA DRIVEN.** 20 years ago FNC created the AI Ready data Standard so our business has always been built on a data first model. Why be a slave to your data? Have your workflow enabled by your data. Whether creating a service request or reviewing a bid, data will be available to improve your decision making processes.

**2 INTELLIGENCE.** With data comes intelligence. Our business rules generator, 'Command Center Live', supports your business by providing a means to create the right rules for your process.

**3 COMMUNICATION.** With the CMS® and our affiliated work portals, AppraisalPort® and InspectionPort®, your vendors are enabled to keep you in the loop at every step of the transaction using our transaction level integrated messaging system and mobile application.

**4 CONFIDENCE.** CMS provides a full audit trail of every service transaction providing the confidence necessary to know you have fulfilled your business processes per guidelines. Your vendors will also be confident of their prompt payment through our invoicing system which manages single and multiple transactions.

**CONNECT.** It's time to enable your data to help you make intelligent commercial lending decisions. Let us help you accomplish that with Commercial CMS.
